

COVID-19 RTPCR Test Report

ICMR Id	305367261
Patient Id	516600
Name	PRAMASIVAN
Age	48
Sex	M
Mobile No	8056836550

S No	Sample Collection Date	Sample Collection Place	Specimen Type	Report Date	Result
1	20.05.2021	SAMATHANAPURAM UPHC	NASOPHARYNGEAL SWAB	21.05.2021	POSITIVE

Checked and Approved By

PROFESSOR & HOD
Department of Microbiology
Tirunelveli Medical College
Tirunelveli – 627011

Prepared By

DR.W. SURESH BABU

Note: The results relate only to the specimens tested and should be correlated with clinical findings.

Interpretation guidance:-

- Testing of referred clinical specimens was considered on the basis of request / referral received from / through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Program (IDSP)/ any other health care facility affirming requirements of the case definition/s.
- A single negative test result, particularly if this is from an upper respiratory tract specimen, does not exclude infection*
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease. The repeat specimens may be considered after a gap of 2 - 4 days after the collection of the first specimen for additional testing if required. *
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director General, ICMR
